

Services Officer

25 February 1949

Chief, FBIB

Installation of Diesel Fuel and Gasoline Supply Storage System,
Mediterranean Bureau, FBIS.

Ref. : Teletype Message No. 251616 to Chief, FBIB from Chief, Mediterranean
Bureau, copy attached.

1. It is requested that:

a. FBIB be granted the authority for installation of
a Diesel fuel and gasoline supply storage system at the new
Mediterranean Bureau station now under construction on the
Island of Cyprus.

b. Your office initiate proper procedures through the
Office of the Chief of Engineers to implement this special
project.

2. Underground storage is believed to be necessary in order
to provide protection for gasoline and oil supplies from possible
sabotage or destruction by fire.

3. Approval of this project at the earliest practicable date
is recommended in order that the work may be supervised by the
Cyprus Area Engineer who is scheduled to turn over the project in
the immediate future. It is estimated that the work will require
approximately three weeks for completion and will cost approximately
\$1200. This office has been advised that the Office of the Chief
of Engineers has in its possession sufficient Cyprus Project funds
for completion of this work.
